## Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-14 and 22-35, drawn to a gaming system comprises a game apparatus, classified in class 463, subclass 1.
- II. Claims 15-17 and 36-38 are drawn to an information storage medium for use in a gaming system, classified in class 463, subclass 43.
- III. Claims 18-20 and 39-41drawn to a gaming system that comprises two game apparatuses classified in class 463 subclass 40.
- IV. Claims 21 and 42 are drawn to a method for a game apparatus, classified in class 463, subclass 1.

The inventions are distinct, each from the other because of the following reasons:

Inventions (I & III) and (IV) are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the process of Invention IV can be practiced with game apparatus(es) that do not contain all the elements of the game apparatus(es) of Inventions I and III.

Inventions (I, III & IV) and (II) are related as combination and subcombination.

Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other

Application/Control Number: 09/677,577

Art Unit: 3714

combinations (MPEP § 806.05(c)). In the instant case, the combination (I, III and IV) as claimed does not require the particulars of the subcombination (II) as claimed because the gaming apparatus(es) and process of using the game apparatus (I, III and IV) do not have to be used with the storage medium of Invention II, and could be operable with another storage medium that does not require the particulars of Invention II. The subcombination has separate utility such as a storage medium in a different game apparatus or apparatuses.

This application contains claims directed to the following patentably distinct species (embodiments) of the claimed invention: Invention III discloses an embodiment (disclosed in the instant disclosure as a fourth exemplary embodiment- page 6, lines 8-17) of a gaming system that contains two game apparatuses, as opposed to one game apparatus, which is required by Inventions I, II and IV. This requires a further search in the network area of the art.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include

Application/Control Number: 09/677,577

Art Unit: 3714

all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Because these inventions are distinct for the reasons given above and the search required for Groups II and III is not required for Groups 1 and IV, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper. Each group requires a search for various limitations that are not required by the other groups

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Application/Control Number: 09/677,577

Art Unit: 3714

Page 5

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

## **USPTO Contact Information**

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Carmen D. White whose telephone number is 703-308-5275. The examiner can normally be reached on Monday through Friday, 8:30 AM to 5:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Tom Hughes can be reached on 703-308-1806. The fax phone numbers for the organization where this application or proceeding is assigned are 703-308-7768 for regular communications and 703-305-3579 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-1078.
